

Lead Free Brass

Brasshards is committed to being a market leader in providing sustainable and environmentally conscious products to the Australian market. As such, our CuPress fittings are made lead free to aid in providing clean drinking water to Australians.

As there is no legislation in Australia surrounding lead free brass in plumbing fittings, we have manufactured CuPress to comply with the US standard for lead free brass. This regulation (section 1417 of the United States Federal Safe Drinking Water Act) states that "Lead Free" must contain a maximum weighted lead content of 0.25%.

Warranty

Brasshards is proud to offer a 25 year warranty against defects and manufacturing faults in CuPress fittings (when installed in accordance with national, state and local plumbing codes by a licensed plumber). Issues arising from incorrect installation, misuse or environmental elements are not covered by this warranty. Please contact Brasshards for a copy of our full warranty document.

Certification

All CuPress fittings are fully compliant with AS3688:2016 (Water supply and gas fittings - metallic fittings and end connectors) as well as AS4020:2018 (Testing of products for use in contact with drinking water).

Applications

Water

Potable water
